Student representatives comments

I found the course very interesting and engaging overall. In my opinion, the course covered too many topics, but because of that the lectures were kept simple and easy to follow, which made the material more accessible.

I felt that there was a lack of lab work, and I wish the practical components had been more complex and in-depth. However, it was my first time working with SBL, and I found it very interesting. I think it is a clever way to connect the lectures with practical learning and encourage students to think critically.

All of the lecturers were very kind, supportive, and willing to answer students' questions, which created a positive learning environment throughout the course.
