Student representatives comments

The course was very appreciated by us students. The lectures were very informative and fun to attend, mainly due to the lecturers using a good structure and presenting the topics in fun ways. Especially, the engagement of the teachers in the learning process was lifted as a factor making the course enjoyable. The lab report and project were demanding but also let us develop new skills and improve our writing. The labs were well planned and there was

sufficient time to finish in time and use extra time to work on the reports.

Many students thought that the schedule could be improved by having more lectures on the same days allowing for days without anything at campus which could be used to work on the projects. There was also a request to not use the word "seminar" in the schedule for things that weren't seminars. For example, we had a "seminar" where we simply just presented different methods to each other, this then could have been labeled as a "presentation" instead to avoid confusion. While the field trip was very appreciated, it would have been great to be able to stay in the forest for a longer time and discuss the subjects of the course in that environment. Even though the lab we had after the field trip was informative, having more time in the forest would probably have been more valuable. Lastly, after the exam some students wished that we would have had more integrated discussions such as those being lifted in the exam. With that said the course was great and held a very high level!
