Course leaders comments

My impression about the work done within the course in Environmental policy (NA0130, advanced course, Spring 2014) is very positive. Students have been providing a quite active and enthusiastic participation to the classes and have been handling all the course tasks with satisfactory results for what concerns the pre-set learning goals.

The entire program has been covered reaching a quite deep analytical comprehension of the topics presented. The climate for what concerns the discussion has been very good and has been characterized by a quite general involvement.

Both lectures and exercise sessions have met the student's interest and have positively contributed to the achievement of a confident understanding of the material proposed. In addition, considering the initial background knowledge and skills, I have noticed a general improvement in both the level of discussion in class and the quality of answers to the problem sets given.

When handling the assigned tasks, students have been always very conscientious and have provided 1) well-written and organized solutions to the proposed assignments and 2) very good final presentations.
