Student representatives comments

Only 2 out of 9 students responded to the survey, so it is difficult to draw any significant conclusions from the student's impression of the course.

However, the students that responded gave average scores for all questions besides administration of the course that got a low score. One student commented that the course material should be uploaded on the course webpage, in case you miss a lecture that makes it easier to catch up.

Overall, the teachers were good and seemed enthusiastic to teach. Some lectures covered a lot of material and sometimes we had to skip parts of it. This, I think, could easily be adjusted. A bit more cooperation between the different parts of the course would also have been good. One section of the course was even left out of the exam due to lack of communication between the teachers.

The tutorials in excel would preferably focus more on understanding the concept of the course, rather than programming equations in excel (that took most of the time). To go through some questions similar to the exam questions would also be good.

Finally, a good course with a relevant and interesting topic. (Perhaps not so much management as the course-title would suggest).

Good luck next year!
