17. What do you think could improve the course?

Kursledarens kommentarer

The course was deemed good at large with good content and instructive assignments. The course structure divided into three blocks with three different larger assignments did work well. The co-learning through discussions and evaluations of each other's work was an appreciated dimension of the course. Overall the social climate was deemed very good and an important resource which could be made use of even more throughout the course. The opportunity to follow some sessions on link was appreciated and could be more developed. In preparation for the next occasion of the course one can pay some attention to the timing of deadlines across the course to get a good rhythm with group work rather in the beginning than in the end of the course.

Studentrepresentantens kommentarer

46 % of the students answered the course evaluation but the answers also corresponded with the general opinions articulated during the course. The general opinion of the course was positive and all different moments were experienced as instructive. Someone wished for possibility to attend via video link on some of the meetings.

Sometimes it was to little time for questions and discussion after the lecture. The discussions and literature seminars were very much appreciated, but at the first literature seminar there was not enough time for discussions.

The three assignments were all good and instructive but in the first assignment it was some confusion about what kind of relation you could have to the child.

In assignment II there was a wish for an opportunity to discuss the choice of strategy in the beginning of the work, maybe it could be done in relation to literature seminar II. The final part of the assignment with an evaluation of two other students work was very appreciated.

Assignment III was experienced as a good complement to the previous assignments but some felt it was hard with a group work over Christmas.
