Student representatives comments

This year it were a slightly higher answer frequency this year than the year before. The overall impression is that the course program have been better this year and the students have not spent quite so much time, only about 28 hrs/week prior to 40 hrs/week the last year.

Most of the students thought the course covered international aspects, that their prior knowledge was sufficient, and that the physical environment were good as well as the social social environment. They also agree on that the lectures, course literature, exercises were good and important for learning, also that the information were easily accessible.

The class seemed satisfied for most of part and i can't add anything about about what could have been done better. The project were highly appreciated.
