The course has worked well. Good crew and engaged students is a vital mix:-) We could do many practicals at Campus which was appreciated. Some useful comments by the students that could and will be considered.

Student representatives comments

All the students seemed to really enjoy this course and have appreciated the dedicated people behind it. This course gave very useful knowledge for the future and it was fun to work so much in the lab!

The information given about the group projects could be more detailed, especially since the course has an intensive schedule as it is. The organisation of files in Canvas needs some improvements, for example including dates in the filenames and gather all info for each course element in separate folders.

The part about Food law would be better if everything was in Swedish. Since most of the students will probably work in Sweden, it would be better to be familiar with the legal terminology in Swedish. It would have been nice to have something more within this part of the course, like practicing writing decisions and appeals. If so, this could be done instead of the HACCP presentations.

One thing that has been expressed many times by students was the lack of time to write and study in between the labs and lectures. Since all the elements in the course are really good and useful knowledge to have as a food agronomist, it would be a shame to eliminate anything. A suggestion given in the evaluation was if it's possible to move the Food law to a less intensive course (for example Food Technology) in order to keep all the elements of this course still within the Food agronomist programme, whilst getting more time in this course for the remaining parts.

Thank you for an interesting and fun course!
