Course leaders comments

The following comments and reflections are in response to the course evaluation of participating students from the course locations Uppsala and Alnarp. The answering rate for the course evaluation 2022 was 80% in Uppsala and 100% in Alnarp. No students from Umeå participated in this year's course. The course was held for the fourth time.

Due to the ongoing pandemic, the course was held in a hybrid format, allowing for online and on-campus participation. Managing the lecture rooms across two campuses and online participants are challenging for teachers and technical problems occur.

The "Meet the Author" sessions for in-depth discussion of key literature with the author of the respective paper were again received positively. This is encouraging us to further develop this as a key element of the course.

Based on the student comments, we will also work on the international perspectives of the course with more invited teachers from abroad, giving their perspectives on sustainable plant production in other agricultural regions in the world.

The exam was held via the online examination tool Inspera for the second time. The students very well received the online examination tool, the structure of the exam as well as the mix of multiple choice and open-ended exam questions.

The group projects need some further improvement for next year. Additional lectures in statistics will be provided as well as the project topics will be more aligned with the course contents and intended learning outcomes.
