Student comments

8 out of 15 students, corresponding to 53% answered the evaluation, which is an increase from the last years, showing that we have somehow managed to motivate the students better.

The course got a very good general grade (average 4.5; median 5)) which was better than during the last years, showing that our continuous work to make the course better has been successful.

The guest lectures by representative from industry, in addition to the study visits at Grådö dairy and Lövsta slaughterhouse were highly appreciated.

Exercises and seminars were considered very helpful for the learning process.

In the meat part we had introduced a new seminar about sustainable meat production, which was appreciated but needs to be modified a bit for next year. More time would be needed to get good discussions and the discussion

leader should not be a student.

In the meat part the CANVAS structure can still be improved.

Students were asking for a lecture about eggs. This is for now included in the food technology course on a basic level and we have no own expertise in the topic, however we will see if we can find some guest lecturer who could speak on a more advanced level about the topic.

Student representatives comments

The course "Animal food science" (LV0108) has generally received positive feedback from us students. With the overall impression being at 4,6/5 and most students (53 %) filling in the evaluation it is safe to say that us students liked the course. In fact, none of the evaluated parts had a score under 4, so the course seems to have been overall well-liked by student. However, as always there are some things that are worth lifting and things that can be improved and/or considered next time the course is held:

Sustainability and Nutritional Value of Meat Seminar:

Several students have told me that they thought the seminar time itself of 1 hour was too short to motivate the amount of preparation needed. Also, the short time hindered any deeper discussion from arising. A good suggestion is to have two moderators, given that the amount of work needed seemed too much for one student.

Egg Lecture: Some students wished for an egg lecture given that it is an important food deriving from animals.
