In general this course was good and interesting and of course with the pandemic everyone have done their best. The teachers have been doing a really good job. Thanks to you, for being so open and supporting during hard times. Also the class is a very nice class. Everyone is very sweet and nice people! You can really feel the good energy that the people bring. Looking forward to this spring and the next semester.

Something that's been brought up several times is the communication when it comes to group work. Participation is very important when it comes to group work and when the lack of participation repeat it self it's getting tiring. In the end of the day it is a master's level. The worst thing with this course has been Zoom. A lot of the comments is about Zoom and that it's been hard to stay focused, motivated, to understand and so on. But now we are back and filled with new energy.
