## Course leaders comments

No comments from the teacher

## Student representatives comments

The overall impression of the course was good, with mentions of how the environment being both including and cozy. Many expressed that the course helped with a new/experimental way of thinking as a good aspect. Working analog with pen and paper was appreciated. Visiting the site of the project was very appreciated and deemed important for understanding the site.

Some felt that the learning environment was sufficient for the first part of the course when it took part in the atelier but as we moved in the smaller group rooms it became cramped. There were some comments about presenting in an A4 box which created last minute stress and limited the creative expression. On average there was an appropriate time spent on the course but some felt like there were short deadlines for pin ups which created stress and some time crunch for the final project.

Overall it was an appreciated course with many comments about the importance of the subject and how working in such a creative way was very rewarding.
