Course leaders comments

From the feedback we got during the course and the evaluations from this Evad, the students have showed great interests in the course with high engagement in all course activities in general and appreciated highly the course outcomes. They wish the course lectures could be arranged more concentrated in terms of time. We tried to arrange all lectures in different time points during the course period, mainly because we thought this could help the students to learn knowledge in various topics more soundly by not being overloaded in a short time, and partially because the teachers are mainly researchers and their available times for the lectures were not so flexible sometime. However, we could think about this for any potential change next year.

Student representatives comments

The students of this course were very happy with the course, and from discussions in the class we were also happy that it was a relatively small class this year which made the learning even more personal and engaging. There was some interest in having a different schedule where lectures were spaced out differently, and to start preparations for the different graded projects at different times rather than starting and presenting everything around the same time-period. The overall impression and feelings around the course were very positive and we felt that we learned a lot about plant biotechnology.
