## Course leaders comments

### Muntlig utvärdering HV0197 – HT22 13 jan 2023

Enligt den muntliga utvärderingen med studenterna var det en bra kurs överlag.

#### Försöksdjursdelen av kursen

Frågorna på tentan var på en annan nivå än den information som gavs på föreläsningen. A lot on the laws and regulations and tricky to find information to get the answer.

Group discussion could have been good hard to ask questions in big class.

Några frågor var på svenska i tentan, svårt för de utländska studenterna som inte pratar svenska.

#### Seminars

It would have been good if the statistical lecture was here in Uppsala and not online.

#### Projektarbete

Mycket jobb under jul och nyår, vore bra att försöka få till en vecka ledigt utan deadlines etc.

#### Kursledarnas kommentarer

Inform about the course in the first year of the master's end of the first course! Så att fler studenter läser kursen.

Lägga om kursen och ha föreläsningsserien i slutet av kursen istället för i början?

## Student representatives comments

---

The students' overall impression of the course was rated high. Some students commented that it was a lot of work with the individual project during the holidays, and it would have been nice to have some more free time without any work. It was good that there was a recommendation to have a supervisor that could help with the project and come up with ideas. The structure in Canvas was nice and clear with different blocks, and it was easy to find what you were looking for.

For the research animals week, it would be good to have more group discussions since there was a bigger class compared with the other weeks. The group discussion could have provided more learning opportunities with the students' different perspectives and maybe easier to come up with more questions to ask the lecturer in whole class. The exam of research animals was a bit difficult for some students, and it was not easy to find the answers to the questions related to laws and regulations.
