### Comments summary gathered from fellow students:

#### Interdisciplinary practices (HU0004)

- General approval by the class;
- Great structure with the three course coordinators, allowing fast communication;
- Different methodologies were presented but sometimes quite abstract for the students;
- The home exam was very well presented, with enough time for execution;
- Literature seminars allowed students to share their own perspectives and understanding of the readings but structured in a way that allowed students to not necessarily contribute actively to the seminar discussions;
- The excursion was a nice opportunity for students to mingle. It felt there was space left for more content to be included during the activities of the day;

About the project:

- Great opportunity to apply different methodologies in a research project, which is of great use for the coming master's thesis;
- Besides some standard orientations, it was appreciated the freedom given to the

students to work on different topics and form the project group;

- Local topics put an extra workload on the Swedes as for some matters the Swedish language was mandatory and some groups only had one or two Swedish speakers members (out of six to eight people).
