Mandatory standard questions

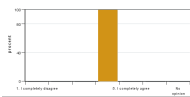

1. My overall impression of the course is:

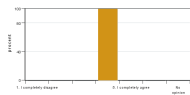

2. I found the course content to have clear links to the learning objectives of the course.

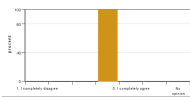

3. My prior knowledge was sufficient for me to benefit from the course.

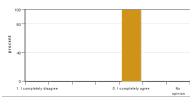

4. The information about the course was easily accessible.

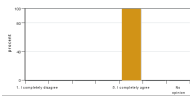

5. The various course components (lectures, course literature, exercises etc.) have supported my learning.

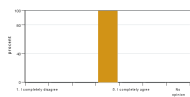

6. The social learning environment has been inclusive, respecting differences of opinion.

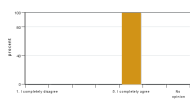

7. The physical learning environment (facilities, equipment etc.) has been satisfactory.

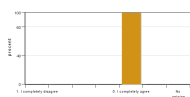

8. The examination(s) provided opportunity to demonstrate what I had learnt during the course (see the learning objectives).

9. The course covered the sustainable development aspect (environmental, social and/or financial sustainability).

10. I believe the course has included a gender and equality aspect, regarding content as well as teaching practices (e.g. perspective on the subject, reading list, allocation of speaking time and the use of master suppression techniques).

11. The course covered international perspectives.

12. On average, I have spent ... hours/week on the course (including timetabled hours).

13. If relevant, what is your overall experience of participating in all or part of your course online?

14. If relevant, please share what worked well when participating in teaching on distance

15. If relevant, please share what worked less well when participating in teaching on distance

Course leaders comments

The sustainable aquaculture course over the academic year 2022 - 2023 was given through distance learning. In addition to the SLU teachers world class experts in various aquaculture topics participated as guest lecturers. Furthermore, on six occasions industry experts gave seminars. Its current form is offered as a part-time one meaning that potential clashes with other courses students have to follow are possible.

Student representatives comments

The course has been a 100% distance course, and the overall impression from the students is that this has worked very well. Lessons and course material have been well adapted to work via zoom and canvas. The possibility of being able to attend live lectures via zoom - as well as

Possible points of improvement for the coming year could be to find a better structure regarding the take-home exam. The gap between what was tested on the exam versus the students' expectations of what was to be examined was quite large. Mostly because the scale in both the

But to summarize: the course has been experienced as incredibly rewarding and interesting. With many different aspects of the industry along with different aspects about sustainability and ethics. The course and course management receive top marks for their efforts!

rs. Believe especially the latter was appreciatd by the students. Overall, six students followed the course performing well in general. On the negative side attendance could have been better, but maybe this has to do also with the fact that the course at

: being able to take part in the recorded lectures on canvas was very much appreciated. One of the most appreciated aspects of the course is the digital study visit, as well as all the guest speakers from the industry. This gave a unique and desirable insight into how aquaculture works i

: number of exam questions and the scope of the expected answers was felt disproportionate to the time available. Also, the one session with the data programming session could need a clarification regarding its purpose, or to be skipped in the future.
