Course leaders comments

All of the course's 11 participants evaluated the course (100% response rate; most likely because there was class time scheduled at the end of the last day for the course evaluation), which means that pretty much all positive and negative aspects of the course have now been documented.

Overall, the students have been happy with the course. The students especially appreciated the first week's study trip; and as the course leader, I will strive to maintain the trip's configuration as it seems to be a winning concept. Most of the other course weeks were also well received (although the rating histogram for the 4th week seems to have been missing for some unknown reason), albeit the 3rd week has great potential for improvement.

Because the course is almost entirely field based, there are many practical aspects that require careful planning, continuous communication, and student cooperation. Considering that 2023 was the course's premiere, I judge that we have succeeded with the practical issues (transport, timetables, accommodation, etc.), and if nothing else, we can further refine practicalities in coming years.

This year, there were large differences in the prior knowledge of the participating students. Many students were 2nd year students with ample vocational experience of Swedish forestry, while others were 1st year students with limited field knowledge. In future years, we have the opportunity to better handle this disparity during instructions and exercises so that all students feel that they can maximize learning.
