Course leaders comments

The overall course structure and format seem to work well and fit different schedules if students have other courses in parallel. One of the main suggestions was to make it clearer which meetings/moments are obligatory to attend online to stimulate discussions and even out the workload a bit so that the later part of the course will not be as time-consuming.

Student representatives comments

Overall the course got high gradings in most of the cases, the overall impression was 4,3, hence there was only 3 out of 8 students that answered the course evaluation. Although the participants had different background the prior knowledge was enough to benefit from the course. The course was completely on distance which worked fine and both the information and the recorded lectures and papers to read were appreciated. According to the course evaluation there could have been some more sustainability included. Average time spent on the course was 16,7 hours/week and some students answered that it was much more to do in the end of the course than in the beginning. It would have been more appreciated if the tasks were spread more during the whole period. The students appreciated that teachers and course leaders were fast in responding to questions and it was easy to get help throughout the course.
