Course leaders comments

The Sustainable Aquaculture course was given for the third consecutive year. Overall, four students attended the course. Based on individual communication and the evaluation the course was perceived positive in general. Students showed interest in the studied topics and performed satisfactorily during the course. On the downside the course would have benefited from a larger class especially in regards to guest lecturers. In addition, we experienced some issues with Canvas and, more specifically, with the planned exam. Those issues were solved promptly and hopefully with the gained knowledge we should be able to avoid similar issues in the future.
