Course leaders comments

Agroecology is an interdisciplinary field, and the course reflects this in lectures and practicals embedded in class discussions and critical thinking exercises. Very happy to see the overall satisfaction with the course. This year we shifted the formation of the groups to a week later. This supported late arriving students, and helps getting to know each other a bit better. We also improved the scheduling / division in social sciences and natural sciences components, which gave a more logical flow. From the comments, the strong accent on scientific writing is felt difficult for some, having had little practice before. We will therefore aim to include some extra exercises for those that feel that the need for more direction. The comments that are not shown here also show that each lecture was listen at least once among the favorites by at least 2 students, indicating that the diversity offered caters to the diversity of backgrounds in the student group. We continue to endeavor to offer the breadth in this entry course as it reflects agroecology in an holistic perspective.
