16. What did you think about the canvas page, (the information found there, the structure, and how we made use of the discussion threads, for example?)

16. Do you have any additional comments (both regarding what you appreciated and what you think maybe did not work as well) that can give us guidance in what to keep and what to change for next year?

Course leaders comments

overall the written course evaluation indicated that students were positive to the course, but gave limited indication on what to keep and what to change. the oral evaluation gave more info and we summarise it here. During the oral evaluation, students appreciated the course and the tools it provided them to prepare for their thesis work. Most of the lectures and seminars were regarded as relevant and students highlighted the usefulness of particular methods and theoretical perspectives for their own projects, also commenting on the diversity of content that the course introduced. For example, the session to present their own proposal and their own mini-research exercise were mentioned as good training for them, and they stressed the importance of getting feedback from their peers and teachers. At the same time, students stated that the coursework was intense but considered it "fun" and "good".

The sessions and assignments about writing, performing literature reviews and advanced information search (the latter performed in collaboration with the SLU Library) were also highlighted as important sessions for the students since they thought it was "good to be forced to try out the databases and think hard about search-strings", as one of the students commented. Similarly, students commented positively on the sessions about "observational methods" and "interviewing", stressing their interest and intention in using these methods for their own thesis.

Regarding the course literature, the students indicated that the main textbooks of the course were relevant and that they would also become more useful during their thesis writing, given the tips and instructions they provided on some methods. Students also discussed some of the claims, and approached critically the content of the books, showing their engagement with the course literature.

On a final note, the students also provided some feedback on specific points, such as adding information about the lecturers on the Canvas calendar as well, including more work/time on discourse analysis and keeping the seminar with the alumni, which they felt worked well as an open dialogue, rather than a formal lecture. Students also suggested bringing examples from studies that implement some of the methods and theories described in the course textbooks, with a special mention of discourse analysis; however, they were critical of the session on "using empirical data to theorise" and the presented research examples. Regarding the Canvas page, students stated that they liked the structure and clarity of the modules, and suggested to include the announcement section in the start page of the course.
