Generally, the course was good. The subject and lectures were interesting and well structured. The lecturer was expertise in the subject and well prepared for teaching. Everyone was treated and assisted equally and adequately during the learning session. There were some mistakes but they were fixed rapidly.

Course materials were well prepared and easy to access. Although, there were many mistakes in the Collection of Formulars and the presentations it had been corrected instantly. The exercises were well picked accordingly to the subject.

The group work for me was neutral since my group members were productive and responsive but the other group might not experience the same. There were not so many rooms for discussions and different opinions in statistics itself but for group working it depended on each group (some group members might not be very engaged but my group members were equally engaged).

The exam was even but there were some parts which were in Swedish.
