Course leaders comments

Course evaluation for Product Development and Innovation Systems in Horticulture (2022)

The overall evaluation of the course was good (4,8). Links to the learning objectives were (4,8) and the course information was easily accessible (4,6). The students perceived that the various course components supported their learning (4,8) and the social learning was good (4,6) as well as the physical learning environment (4,6). The examinations provided a good opportunity to demonstrate learnings (4,6) and students perceived the course to cover sustainable development aspects (4,8), international perspectives (4,8) and gender perspectives (4,8). Even though the Covid-situation was less severe and allowed, for on campus activities, it had an impact on the course and some of the included educational activities. Hybrid was sometimes difficult to manage, and we will try to continue to avoid this next year. However, when appropriate we will continue to have activities digitally. Positive aspects will thus be kept and continue to be incorporated and considered post-corona.

The course book is appreciated, however, the link between the course book and teaching activities has to be developed further.

Exercises were perceived as relevant, however minor adjustments will continue to be implemented.

Next year we will continue to work on the inter-disciplinary parts of the course.

Within the teacher team we will also continue to work on developing the instructions connected to included exercises.
