Internal comments

Student representatives comments

It seems like the students overall are pleased with the course and many of them thought it was interesting. The various lecturers were knowledgeable and appreciated. The students are happy with Enoch's presence and support during the course, especially during the group project. However, many students mention that they found the group project challenging since it required a decent amount of knowledge in econometrics and STATA. They hadn't really worked with time series regression before and therefore some suggest a shorter overview of that in the start-up of the project. Other improvements mentioned in the evaluation are a different set-up for the group presentations with less time pressure, for example presentations in half class next year. Some also wished for a better structure on Canvas. On the whole, the reviews are good and I personally think it was an interesting and important course based on today's development in society.
